Fiscal Year 2024 Financial Guidance

Use of Non-GAAP Financial Measures

Accuray reports its financial results in accordance with generally accepted accounting principles in the United States ("GAAP") and the rules of the SEC. To supplement its financial statements prepared and presented in accordance with GAAP, Accuray uses certain non-GAAP financial measures, such as adjusted EBITDA, gross orders on a constant currency basis and net revenue on a constant currency basis.

Accuray has supplemented its GAAP net income (loss) with a non-GAAP measure of adjusted earnings before interest, taxes, restructuring charges, ERP and ERP related expenditures, depreciation, amortization and stock-based compensation ("adjusted EBITDA"). The calculation of adjusted EBITDA also excludes certain non-recurring, irregular and one-time items. Management believes that this non-GAAP financial measure provides useful supplemental information to management and investors regarding the performance of the company and facilitates a meaningful comparison of results

for current periods with previous operating results. A reconciliation of GAAP net income (loss) (the most directly comparable GAAP measure) to non-GAAP adjusted EBITDA is provided in the schedules below.

Accuray has also reported certain operating results on a constant currency basis in order to facilitate period-to-period comparisons of its results without regard to the impact of foreign currency exchange rate fluctuations. Management believes disclosure of non-GAAP constant currency results is helpful to investors because it facilitates period-to-period comparisons of the company's results by increasing the transparency of the underlying performance by excluding the impact of foreign currency exchange rate fluctuations. The GAAP measure most directly comparable to net revenue on a constant currency basis is revenue. Accuray calculates the constant currency amounts by translating local currency amounts in the current period using the same foreign translation rate used in the prior period being compared against rather than the actual exchange rate in effect during the current period.

There are limitations in using these non-GAAP financial measures because they are not prepared in accordance with GAAP and may be different from non-GAAP financial measures used by other companies. These non-GAAP financial measures should not be considered in isolation or as a substitute for GAAP financial measures. Investors and potential investors should consider non-GAAP financial measures only in conjunction with the company's consolidated financial statements prepared in accordance with GAAP.

Forward-looking Statements

This presentation is intended exclusively for investors. It is not intended for use in Sales or Marketing.

Safe Harbor Statement

Statements of historical fact are forward-looking statements and are subject to the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements in this presentation relate, but are not limited, to: expectations regarding fiscal 2024 full-year adjusted EBITDA and revenue; our positioning and strategy for accelerating revenue growth and profitability as well as margin expansion; and expectations regarding our positioning for value-based care. Forward-looking statements generally can be identified by words such as "anticipates," "believes," "estimates," "expects," "intends," "plans," "projects," "may," "will be," "will continue," and similar expressions. These forward-looking statements involve risks and uncertainties that could cause actual results to differ materially from expectations. These risks and uncertainties include, but are not limited to: risks related to the current global economic environment, including in connection with the COVID-19 pandemic, inflation or recession on our business, financial condition, results of operations or cash flows; disruptions to our supply chain, including increased logistics costs; our ability to achieve widespread market acceptance of our products, including new product offerings and improvements; our ability to develop new products or enhance existing products to meet customers' needs and compete favorably in the market; our ability to realize the expected benefits of the joint-venture and other partnerships; risks inherent in international operations; customers needs and compete divorably in the market; our ability to realize the expected benefits of the joint-venture and other partnerships; risks inherent in international operations; our ability to effectively manage our growth; our ability to maintain or increase our gross margins on product sales and services; delays in regulatory approvals or the development or release of new offerings; our ability to meet the covenants under our credit facilities; our ability to convert backlog to revenue; and other risks identified under the heading 'Risk Factors' in our quarterly report on Form 10-Q, filed with the Securities and Exchange Commission (the "SEC") on May 8, 2023, and as updated periodically with our other filings with the SEC. Forward-looking statements speak only as of the date the statements are made and are based on information available to Accuracy at the time those statements are made and/or management's good faith belief as of that time with respect to future events. Accuracy assumes no obligation to update forward-looking statements for effect actual performance or results, changes in assumptions or changes in other factors affecting forward-looking information, except to the extent required by applicable securities laws. Accordingly, investors should not place undue reliance on any forward-looking statements.

Non-GAAP Financial Measures

This presentation also contains non-GAAP financial measures. Management believes that non-GAAP financial measures provide useful supplemental information to management and investors regarding the performance of the company and facilitates a more meaningful comparison of results for current periods with previous operating results. Additionally, these non-GAAP financial measures assist management in analyzing future trends, making strategic and business decisions, and establishing internal budgets and forecasts. A reconciliation of these non-GAAP financial measures to the most directly comparable GAAP measure is provided in the Appendix.

Accuray has also reported certain operating results on a constant currency basis in order to facilitate period-to-period comparisons of its results without regard to the impact of foreign currency exchange rate fluctuations. Management believes disclosure of non-GAAP constant currency results is helpful to investors because it facilitates period-to-period comparisons of the company's results by increasing the transparency of the underlying performance by excluding the impact of foreign currency exchange rate fluctuations. Accuracy calculates the constant currency amounts by translating local currency amounts in the current period using the same foreign translation rate used in the prior period being compared against rather than the actual exchange rate in effect during the current period.

There are limitations in using these non-GAAP financial measures because they are not prepared in accordance with GAAP and may be different from non-GAAP financial measures used by other companies. These non-GAAP financial measures should not be considered in isolation or as a substitute for GAAP financial measures. Investors and potential investors should consider non-GAAP financial measures only in conjunction with the company's consolidated financial statements prepared in accordance with GAAP.
